

CHAPTER III

3. PROPOSAL

The proposal for the implementation of an interactive English laboratory at the Cotopaxi Technical University San Felipe neighborhood, falls basically to present a manual signaling for the student's achievement in the English career, considering that this is very essential, useful for the development of each student.

3.1 INFORMATIVE DATA

INSTITUTION: Technical University of Cotopaxi.

CAREER: English Career.

PROVINCE: Cotopaxi.

CANTON: Latacunga.

PARISH: Eloy Alfaro.

NEIGHBORHOOD: San Felipe.

RESEARCHER: Sabina del Carmen Chango Chasi.

3.2 IMPORTANCE

A manual is the systematic collection of processes that has the students, teachers at the Technical University of Cotopaxi explaining the activities to be carried and how actions should be performed which essential to the achievement of objectives. It was created in order to bring their attention information we believe will be useful for the development of their interactive laboratory activities of English.

The purpose of this manual is to provide an updated, concise and clear of the activities in each process. Therefore, a manual can never regard it as complete and comprehensive as it should evolve with the organization.

3.3 JUSTIFICATION

People who manage the English laboratory in centers of High Education in the English area do not have the signwriting updated which will help to improve the students' knowledge.

This signwriting will be used at Technical University of Cotopaxi and it will be reproduced by students of the English career.

A label signal system allows a flexible use and enables the change of the information provided according to the interests of each unit. Also label signal system to use for all symbols will also include a corresponding application exposed the English language.

All types of signal systems that identify a service and so on. For that reason, they must be located both on the wall or banner type that enables your vision on both sides, as well as windows, desks and tables. Do not allow the use signal system on doors except in cases where students do not damage the lettering shown.

3.4 OBJECTIVES

GENERAL

Establish in depth information in the manual with the issue of symbol systems to enable the optimal operation of the signaling equipment designed in the English interactive laboratory properly for students and teachers of the English Career.

SPECIFIC

- Describe risks, warnings, precautions, related symbol systems with in an English interactive laboratory.
- Achieve a good understanding of each of the students watching the symbol systems in order to interpret and act on the Interactive English laboratory.
- Ensure the safety of the signage and get the proper maintenance of good working habits of students, teachers of the English Career

3.5 FOUNDATION

SCIENTIFIC

The signwriting as a security norm for using the English laboratory properly is an essential tool which allows students, teachers or others who do not suffer a particular harm. Thus means safety signs to an activity or real situation that provides information or instructions concerning the safe by a symbol system, a color, a light or sound, or verbal communication a hand signal, as appropriate.

A signwriting manual is the document containing the description of activities to be followed. This manual may contain information and examples of forms, authorizations or documents needed machines or office equipment used and any other information that may assist the smooth operation of laboratory.

METHODOLOGICAL

This manual helps in a large percentage methodological basis because it has several types of signals, that help them differentiate between them and it is noteworthy that intervention alternatives available, which is based on images, etc.in order to allow students, teachers and users the values, habits, knowledge to conserve, ownership and enjoyment by the public.

The manual is an effective tool for tracking fast and effective users of signaling system.

PSYCHOLOGICAL

This manual has been developed with the intention to implement a standardized system of signwriting and binding use applicable to all physical facilities and infrastructure of the English laboratory, which symbols system common language symbol system guidance and information for students.

Security requirements that the labeling information must be symbol system to students and simplify institutional signaling system using the information and the graphic medium to provide a better quality of care of students.

The signwriting installed on the inside of the laboratory of English is adequate for use as well as orientation.
